

## THESSALY, GREECE CROSS-VISIT TO DALSLAND, SWEDEN

Dates: 14<sup>th</sup>-17<sup>th</sup> of May 2018 (Programme Annex 1)

Host reflections on cross-visit:

The planned programme worked well. Our guests had a pretty good idea of which innovations they were interested in already on arrival: GPS and GIS- solutions and technical and marketing innovations for goat and dairy production. There was enough time to study those innovations and some ideas on how to apply them in Thessaly were also discussed. Thanks to the amount of debriefing time in the evenings there was also room for discussing social and institutional gaps which the two learning areas had in common and possible next steps.

We could keep to the schedule in terms of punctuality. Thanks to our open-minded guests the cross visit was a success and filled with joy, laughter good conversation.

For the next cross visit with a larger group of guests it could be useful if time was spent at each farm visit to have a short debriefing session on what we see and what we learn and not to save those thoughts until the evening. Also, it could be useful to contact local media a week or so in advance so that they have time to read up on the subject and take part on a farm visit.
