

Project funded by the European Union

Volos 18 November 2018

Target of the meeting:

Configuration and operational planning of a framework in order to support new producers.

Concept note

Increasing evidence of young people who have got involved in agriculture and the difficulties they are facing due to the lack of a support system throughout their establishment in the sector.

The promising creation of PINDOS network that aims at rationally managing its area of activity in order to support its development.

The wide range of innovative support tools-mainly the organizational ones- that were promoted through the implementation of the HORIZON 2020 Programme.

The following questions are raised for consultation:

- What will be the operational implementation of the desire that PINDOS network has expressed to support its young citizens in order to make an attempt locally at the primary sector capitalizing on innovative tools (technological and mainly organizational) ?
- What different kinds of cooperation can be developed and what are the financial instruments that are possible to utilize?

Invitation to meeting

Integrated interventions and actions for the management, promotion and exploitation of Pindus and Chasia, as areas of extensive production systems.

Within the context of HORIZON 2020 HNV-Link the area of Pinde that is part of Thessaly and Chasia-Antichasia has been chosen to function as an implementation zone for pilot applications and innovations that will support and promote the High Nature Value characteristics of the agricultural holdings. The intention to create a Support and Cooperation Center for the High Nature Value areas, in cooperation with the municipalities of this area due to their abundance and distinctiveness, was positively evaluated by the European partners as the most innovative action.

The Center organizes a meeting-consultation in order to provide information about its up to now informal operation and the numerous innovative tools that it is able to place at the disposal of the producers for the production of local quality products with a specific identity. The main participants of the meeting will be the Local Government, the National Park of Tzoumerka, new farmers and research bodies.

The meeting will be held on Friday 7 December 2018, at 17.00, in Mouzaki, at Mouzaki Palace.

Kind regards,

Prof. Dimitrios Goussios
